

Moritz Roessler
Senior Fullstack Developer

I'm a 32-year-old software developer from Germany. My favorite language is without a doubt **TypeScript**. It's the language I grew up with, learning to code and still love to use on a daily basis 11 years later. I'm really happy to see the language evolve, driven by the community, and see tools like Babel grow from an experiment to the leading standard for transpiling JavaScript. I have about **11 years** of in-depth knowledge in **JavaScript** and can handle complex tasks like writing a compiler. I spent about 7 years on Node.js and have experience with a variety of frameworks like React, MUI, Vue, serverless, etc.. **React** is definitely my favorite framework of the last years and has been what kept me fascinated over the past years. I have experience working with experienced remote teams of senior developers in an agile environment using Scrum. I value **code quality** over quantity and am experienced in working with and maintaining a high-quality codebase. As a team we leverage unit tests, end-to-end tests and visual regression tests to assure quality and reduce the workload of QA. As with most experienced scrum teams, staged environments, **CI/CD** pipelines, and thorough code review are a standar. I love to code, and I highly appreciate quality code. I prefer TypeScript over JS because type safety is a valuable tool to vastly reduce the chance of introducing bugs. I'm used to restrictive **ESLint** rulesets and formatters. I'm well familiar with Git and Docker and use both on a daily basis. I'm used to conventional branching models. I have experience writing serverless applications on AWS (Lambda) and DynamoDB. I love writing code. From code-golfing and king-of-the-hill battles over crypto trading bots to processing high-frequency real-time sensor data or doing sophisticated statical software analysis. I like to experiment a lot, so most of my projects don't make it past a proof of concept stage as the last 20% are usually the most time-consuming. I spent the last two years working with analyzing and processing high quantities of real-time data (about 1.5M data points/day) and the problems that arise trying to analyze that amount of disjoint data. I'm currently developing a server-side framework that brings React to the server side and allows you to develop modular, production-grade backend components.

Find out how to profit from my experience.

At 85% productivity.

Education

2012 - 2015

FIAE at Walther Rathenau

2001 - 2009

Fachhochschulreife at Kepler Gymnasium

Work History

May 2012 - Mar 2015

FIAE at **Bechtle**

Germany - Freiburg

★ JavaScript Java LotusScript

Lotus Notes Domino

Mar 2015 - Mar 2016

Junior Software Engineer at **Bechtle**

Germany - Freiburg

LotusScript Lotus Notes Domino Basic

May 2016 - Apr 2017

Living abroad in Chile at **Arboleda Emaluisa**

Chile, Temuco

★ JavaScript ★ TypeScript ★ React MUI

May 2018 - May 2019

Junior Software Engineer at **Bechtle**

Germany - Freiburg

C# Perl

Jan 2020 - Dec 2021

Software Engineer at **Spoo**

Germany - Denzlingen

PSQL ★ JavaScript Vue Kafka Docker

Kubernetes

Feb 2022 - Jul 2022

Senior Frontend Developer at **Cosuno**

Portugal - Braga

★ TypeScript ★ GraphQL ★ React

Sep 2022 - now.

Senior IT Developer at **Digitas Pixelpark**

Germany - Freiburg

★ React ★ Next.js ★ TypeScript

GraphQL ★ JavaScript

Jan 2025 - ?

Senior Fullstack Developer at your company

Europe (probably Germany)

Portfolio (1 - 3)

Maxon Online Presence

1.5 years

<https://preview.maxongroup.com/de-de>
Website

A modern website for the maxon company to showcase and...

...sell their products. A world-wide digital presence using state of art technology to power the website. Coremedia as CMS and Salesforce as commerce engine ensure a scalable backend infrastructure. Next.js and React provide a modern headless frontend.

React Server

1 year

<https://state-less.cloud>
Website

<https://github.com/state-less/clean-starter>
Repo

An open source framework that let's you use TSX components...

...on the backend. This allows to rapidly prototype sophisticated full-stack services using React's principles from the frontend on the backend.

Lists App

1 year

<https://lists.state-less.cloud>
Website

<https://github.com/C5H8NNaO4/lists-app-backend>
Repo

A simple productivity app to showcase what you can build..

...with React Server.
